SUMMARY

Full-Stack Developer with practical experience in building web applications using the **MERN stack and Next.js**. Developed responsive user interfaces and implemented backend features for scalable and efficient solutions. Worked on multiple projects involving API integration, authentication, and modern UI design. Skilled in developing responsive user interfaces, integrating backend functionality, and delivering scalable project solutions.

EDUCATION

Sarvajanik College of Engineering & Technology (SCET)

B.Tech. Information Technology — CGPA: 9.34

Surat, India

2022 – 2026

EXPERIENCE

Web Development Intern

Cybersecurity Umbrella

Jan 2026 – Apr 2026

On Site

- Worked on building dashboards and internal tools using Next.js. Built backend services using Node.js and Express.js.
- Integrated APIs and handled frontend-backend communication.
- Worked with PostgreSQL for database design and data management.

LEADERSHIP

Head of Event Management — Converse 2K25

SCET

2025

Surat, India

Event Page: [instagram.com/converse2k25](https://www.instagram.com/converse2k25)

- Led a two-day national tech fest with **2000+ participants** and managed **180+ coordinators and volunteers**.
- Handled communication through WhatsApp groups for smooth coordination. Proposed 30+ event ideas; one concept was selected and executed.
- Developed the official event platform to streamline registrations and operations.

PROJECTS

- **Converse-2K25** — *React.js, Node.js, Express.js, MongoDB, Firebase, Nodemailer* — GitHub · Live Demo
 - Built a tech fest platform where participants register for events and receive confirmation emails. Admin panel manages user data and exports registrations for event handling.
- **Memories App** — *React.js, Node.js, Express.js, MongoDB* — GitHub · Live Demo
 - Developed a CRUD-based application where users can add memories with image, title, description, and tags. Users can view all posts, update or delete their own entries.
- **Email Awareness Platform** — *Next.js, Node.js, Express.js, PostgreSQL, Nodemailer* — GitHub
 - Built a training platform where companies register and create courses for employees. Employees complete quizzes and receive certificates via email. Admin dashboard includes user reports and PDF download functionality.
- **uvMart** — *MERN Stack, Nodemailer* — GitHub
 - Developed an e-commerce style platform with basic product management and email notification features.
- **Converse-2K24** — *React.js, Firebase* — GitHub
 - Created an event registration website with Firebase integration for handling user data and event participation.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js
- **Database:** MongoDB, Firebase, PostgreSQL
- **Tools:** Git, GitHub, Vercel
- **Languages:** JavaScript, Python, Java, C
